Application No. 09/195,105
Amendment dated November 14, 2009
Reply to Office Action of June 22, 2009

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (currently amended) A point of sale tax reporting system in an environment where a consumer purchases goods, the point of sale tax reporting system comprising:
 - at least one tax register located at a location of a merchant or retailer, said at least one tax register adapted to process data for a consumer sales transaction at the merchant or retailer location and compute use tax data for the transaction to be indicated to an appropriate state agency based upon at least one of a location of the consumer and a location where purchased goods are to be shipped, said at least one tax register forwarding said transaction data and said use tax data to at least one of the state agency and a credit card processing company for processing, wherein a transaction number associated with and identifying the transaction is provided by said at least one tax register to the consumer, and said transaction data includes at least an amount of money received by the merchant or retailer from the consumer for the purchased goods;
 - a computer system including at least a first computer and a corresponding first memory disposed at the state agency, said first computer and said first memory adapted to receive and store said transaction data and said use tax data forwarded from one of the credit card processing company and the merchant or retailer location;
 - a first communication link permitting the connection of at least one of (i) said at least one tax register at the merchant or retailer location and (ii) the credit card processing company, to said computer system at the state agency, said first communication link for permitting said at least one tax register or the credit card processing company to forward said transaction data and said use tax data to

Application No. 09/195,105
Amendment dated November 14, 2009
Reply to Office Action of June 22, 2009

said first computer and said first memory so that said transaction data and said use tax data from the merchant or retailer is automatically forwarded to the state agency and stored in said first memory in order to help enforce tax laws and prevent at least one of the consumer and the merchant or retailer from avoiding payment of a use tax; and

a second communication link permitting the consumer to connect with said computer system at the state agency, said second communication link enabling the consumer to input the said transaction number to said computer system and receive confirmation from the state agency whether the transaction associated with and identified by said transaction number has been properly reported.

2. (previously presented) The point of sale tax reporting system of claim 1, wherein said at least one tax register is adapted to process data for the consumer sales transaction where the consumer purchases the goods with one of a credit card, a debit card, and any form of electronic payment.
3. (previously presented) The point of sale tax reporting system of claim 1, wherein said first communication link is one of a digital packet switched network and a satellite network.
4. (previously presented) The point of sale tax reporting system of claim 1, further including at the merchant or retailer location means for accessing the credit card processing company in response to the transaction so that the credit card processing company automatically charges a credit card of the consumer with both a sales price of the purchased goods and the use tax based upon the location where the consumer requests that the purchased goods be shipped.
5. (previously presented) The point of sale tax reporting system of claim 4, further including means for allowing the credit card processing company to forward the use tax charged to the consumer to the state agency, wherein the use tax, where appropriate, is automatically charged to the consumer, and where the use tax includes a sales tax.

Application No. 09/195,105
Amendment dated November 14, 2009
Reply to Office Action of June 22, 2009

6. (previously presented) The point of sale tax reporting system of claim 1, further including means for issuing a tax stamp receipt to the consumer as evidence of a tax paid for attachment to a parcel.
7. (previously presented) The point of sale tax reporting system of claim 1, further including a connection to a digital data network to provide for the connection of the merchant or retailer location to the location of the consumer, said digital data network for allowing the consumer to purchase the goods from the merchant or retailer via said digital data network.
8. (previously presented) The point of sale tax reporting system of claim 1, wherein said first communication link includes the use of at least one of a telephone line, a digital data network, and a satellite wireless communication link.
9. (currently amended) A point of sale tax reporting system in an environment where a consumer purchases goods over a digital data network, the point of sale tax reporting system comprising:

said digital data network adapted to enable the consumer to purchase goods over said digital data network from a merchant or retailer;

at least one of a first computer and a register located at a location of the merchant or retailer, said at least one of a first computer and a register adapted to process consumer sales transaction data at the merchant or retailer location and forward use tax data and the transaction data for a transaction to at least one of a state authorized entity and a credit card processing company, wherein a transaction number associated with and identifying the transaction is provided by said at least one of a first computer and a register to the consumer, and the transaction data includes at least an amount of money received or to be received by the merchant or retailer from the consumer for the transaction;

a computer system including at least a second computer and a corresponding memory disposed at the state authorized entity, said second computer and said corresponding memory adapted to receive and store the use

Application No. 09/195,105
Amendment dated November 14, 2009
Reply to Office Action of June 22, 2009

tax data and the transaction data forwarded from one of the credit card processing company and the merchant or retailer; and

a first communication link permitting the connection of at least one of (i) said at least one of a first computer and a register at the merchant or retailer location and (ii) the credit card processing company, to said second computer and said corresponding memory at the state authorized entity, said first communication link for permitting said at least one of a first computer and a register, or the credit card processing company to forward the use tax data and the transaction data to said second computer and said corresponding memory, wherein the use tax data from the merchant or retailer is automatically forwarded to the state authorized entity and stored in said corresponding memory in order to help enforce tax laws and prevent at least one of the consumer and the merchant or retailer from avoiding payment of a use tax; and

a second communication link permitting the consumer to connect with said computer system at the state authorized entity, said second communication link enabling the consumer to input ~~the said~~ transaction number to said computer system and receive confirmation from the state authorized entity whether the transaction associated with and identified by said transaction number has been properly reported.

10. (previously presented) The system of claim 9, wherein said at least one of a first computer or a register computes the use tax data.
11. (previously presented) The system of claim 9, wherein said digital data network includes a packet switched digital data network.
12. (previously presented) The system of claim 9, wherein the state authorized entity is a State Treasury or a taxing authority.
13. (previously presented) The system of claim 9, further comprising means for charging a credit card of the consumer for purchasing the goods and the use tax due thereon.

Application No. 09/195,105
Amendment dated November 14, 2009
Reply to Office Action of June 22, 2009

14. (previously presented) The point of sale tax reporting system of claim 1, wherein said at least one tax register comprises a PC-based point-of-sale system including a keyboard, a credit card reader, a bar code reader, and a receipt printer.
15. (previously presented) The point of sale tax reporting system of claim 1, wherein said at least one tax register comprises a declining register.
16. (previously presented) The point of sale tax reporting system of claim 1, further comprising at the merchant or retailer means for causing each of: (a) summaries of transactions to be provided; (b) a summary list of the transactions to be provided; and (c) a checking account of the merchant or retailer to be charged so that money is taken from the checking account of the merchant or retailer based on said transaction data and said use tax data forwarded to said first computer and said first memory.
17. (currently amended) A point of sale tax reporting system in an environment where a consumer purchases goods, the point of sale tax reporting system comprising:

a tax register located at a location of a retailer, said tax register adapted to process data for a consumer sales transaction at the retailer and compute use tax data for the transaction to be provided to an appropriate state agency based upon at least one of a location of the consumer and a location where purchased goods are to be shipped, said tax register forwarding said transaction data and said use tax data to at least one of the state agency and a credit card processing company for processing, wherein a transaction number associated with and identifying the transaction is provided by said tax register to the consumer, and said transaction data includes at least an amount of money received by the retailer from the consumer for the purchased goods;

a computer system at the state agency including at least a first computer and a corresponding first memory, said first computer and said first memory

Application No. 09/195,105
Amendment dated November 14, 2009
Reply to Office Action of June 22, 2009

adapted to receive and store said transaction data and said use tax data forwarded from one of the credit card processing company and the retailer;

a first communication link permitting the connection of at least one of (i) said tax register at the location of the retailer and (ii) the credit card processing company, to said first computer and said first memory, said first communication link for permitting said tax register or the credit card processing company to forward said transaction data and said use tax data to said first computer and said first memory so that said transaction data and said use tax data from the retailer is automatically forwarded to and stored in said first memory in order to help enforce tax laws and prevent at least one of the consumer and the retailer from avoiding the payment of a use tax; and

means for causing at the retailer each of: (a) summaries of transactions to be provided; (b) a summary list of the transactions to be provided; and (c) a checking account of the retailer to be charged so that money is taken from the checking account of the retailer based on said transaction data and said use tax data forwarded to said first computer and said first memory; and

a second communication link permitting the consumer to connect with said computer system at the state agency, said second communication link enabling the consumer to input the said transaction number to said computer system and receive confirmation from the state agency whether the transaction associated with and identified by said transaction number has been properly reported.

18. (previously presented) The system of claim 17, wherein said tax register is adapted to process data for the consumer sales transaction where the consumer purchases the goods with one of a credit card, a debit card, and any form of electronic payment.
19. (previously presented) The system of claim 17, wherein said first communication link is one of a digital packet switched network and a satellite network.

Application No. 09/195,105
Amendment dated November 14, 2009
Reply to Office Action of June 22, 2009

20. (previously presented) The system of claim 17, further including a digital data network provided so as to connect the retailer location to the location of the consumer, said digital data network for allowing the consumer to purchase the goods from the retailer via said digital data network.
21. (previously presented) The system of claim 17, wherein said tax register comprises a PC-based point-of-sale system including a keyboard, a credit card reader, a bar code reader, and a receipt printer.
22. (previously presented) The system of claim 17, wherein said computer system further includes a verifying computer connected to said first computer, said first memory, and said second communication link, said verifying computer adapted to receive the transaction number from the consumer and send confirmation to the consumer that the transaction has been properly reported.
23. (previously presented) The point of sale tax reporting system of claim 1, wherein said computer system further includes a verifying computer connected to said first computer, said first memory, and said second communication link, said verifying computer adapted to receive the transaction number from the consumer and send confirmation to the consumer that the transaction has been properly reported.
24. (previously presented) The system of claim 9, wherein said computer system further includes a verifying computer connected to said second computer, said corresponding memory, and said second communication link, said verifying computer adapted to receive the transaction number from the consumer and send confirmation to the consumer that the transaction has been properly reported.
25. (previously presented) The system of claim 9, wherein said at least one of a first computer and a register is adapted to process data for the consumer sales transaction where the consumer purchases the goods with one of a credit card, a debit card, and any form of electronic payment.

Application No. 09/195,105
Amendment dated November 14, 2009
Reply to Office Action of June 22, 2009

26. (previously presented) The system of claim 9, wherein said first communication link is one of a digital packet switched network and a satellite network.
27. (previously presented) The system of claim 9, wherein said at least one of a first computer and a register comprises a PC-based point-of-sale system including a keyboard, a credit card reader, a bar code reader, and a receipt printer.
